

Que 1) Plot a histogram,

10, 13, 18, 22, 27, 32, 38, 40, 45, 51, 56, 57, 88, 90, 92, 94, 99

Que 2) In a quant test of the CAT Exam, the population standard deviation is known to be 100. A sample of 25 tests taken has a mean of 520. Construct an 80% CI about the mean.

Que 3) A car believes that the percentage of citizens in city ABC that owns a vehicle is 60% or less. A sales manager disagrees with this. He conducted a hypothesis testing surveying 250 residents & found that 170 residents responded yes to owning a vehicle.

a.

State the null & alternate hypothesis.

b.

c.

At a 10% significance level, is there enough evidence to support the idea that vehicle owner in ABC city is 60% or less.

d.

Que 4) What is the value of the 99 percentile?

2,2,3,4,5,5,5,6,7,8,8,8,8,8,9,9,10,11,11,12

Que 5) In left & right-skewed data, what is the relationship between mean, median & mode?

Draw the graph to represent the same.

Q1.

Plot a histogram

Bins = 5

bin size = 20

10, 13, 18, 22, 27, 32, 38, 40, 45

51, 56, 57, 88, 90, 92, 94, 9

Q2

$$\sigma = 100, n = 25, \bar{x} = 520, C.I = 80\%$$

$$C.I = \bar{x} \pm Z_{\alpha/2} \frac{\sigma}{\sqrt{n}}$$

$$\alpha = 1 - 0.80$$
$$= 0.20$$

$$Z_{\alpha/2} = Z_{\frac{0.20}{2}} = Z_{0.10}$$

$$Z_{0.10} = 1.28$$

$$C.I = \bar{x} \pm Z_{\alpha/2} \frac{\sigma}{\sqrt{n}}$$

$$520 \pm 1.28 \times \frac{100}{\sqrt{25}}$$

$$520 \pm 1.28 \times 20$$

$$520 \pm 25.6$$

$$545.6$$

$$520 - 25.6$$

$$= 494.4$$

$$HF = 545.6$$

$$LF = 494.4$$

Q3

$$H_0: P \leq 60\% \quad n=250$$

$$H_1: P > 60\% \quad x=170$$

$$\alpha = 0.10 \text{ (significance level)}$$

$$P_0 = 0.60$$

$$\hat{P} = \frac{x}{n} = \frac{170}{250} = 0.68$$

$$q_0 = 1 - 0.60 = 0.40$$

Z test

$$\frac{\hat{P} - P_0}{\sqrt{\frac{P_0 q_0}{n}}} = \frac{0.68 - 0.6}{\sqrt{\frac{0.6 \times 0.4}{250}}}$$

$$P\text{-value} = 0.00494$$

$$1 - 0.99506$$

$P < \text{significance level}$

Con-

Null Hypo rejected

Q4

$$\text{Value} = \frac{\text{Percentile} \times (n+1)}{100}$$

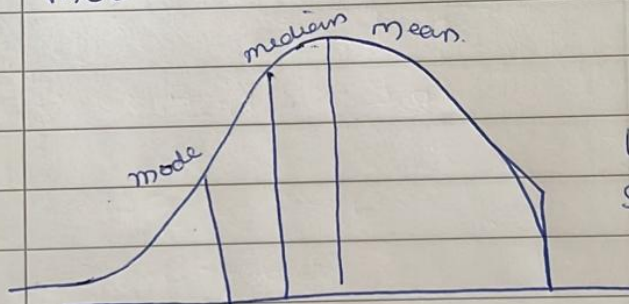

$$= \frac{99}{100} \times 21 = 20.79 = 21$$

Q5

Right Skewed.

$$\text{mode} < \text{median} < \text{mean}.$$

Left
Skewed.

$$\text{mean} < \text{median} < \text{mode}.$$
